

SAFETY TOOLBOX TALK

Ref:	063	Author:	D Bibby	Date:	08.02.2024
Topic:			Plant and Machinery		

This briefing is not intended to tell you how to do your jobs, it is designed to help keep you safe. We want everybody to be able to return home safely to their family and friends at the end of each day.

Plant and equipment you operate, as part of your work, is dangerous and can cause serious accidents and in some instances, these can be fatal.

Plant and equipment are provided to you and are designed to make you more efficient, it is not designed for your inquisitive or playful nature.

You must be authorised or qualified to use plant and machinery e.g. CPCS, IPAF, if you are asked to operate any plant that you are not authorised/qualified to use, YOU must refuse and make your supervisor aware.

Plant and machinery should be inspected daily for oil, water, fuel, performance of lights, mirrors, beacons, and audible devices along with inspection of its function before and after use.

If any item is defective then you should report this to your supervisor immediately. Do's

- Do inspect all plant for damage and faults before commencing works.
- Do adhere to site access routes, road and speed limits when operating plant.
- Do wear your seat belt at all times when operating plant and machinery.
- Do park plant and machinery with the handbrake applied and placed in neutral
- Do check all mirrors and blind spots before moving off.

Don'ts

- DON'T operate plant unless you are seated at all times.
- DON'T carry passengers unless there is seating provided for this purpose.
- DON'T remain seated on dumpers when being loaded, machine operatives must not load dumpers with operators seated.
- Plant and machinery MUST be switched off when not in use.
- Plant and machinery MUST not be left unattended with keys or immobiliser keys left in

Towing

For towing operations, the supplied towing pin should be used, NOT an improvised pin e.g. reinforcing. When towing plant and equipment the handbrake must be released and the jockey wheel lifted.

See The Fox Group Safe Systems of Work for applicable Plant & Machinery.

Discussion Points

What should you consider when using plant and machinery?

Do you have the relevant training required to use plant and machinery safely?
